

Kazam

April 2025 – Present

Data Science Engineer

Bengaluru

- Managed and optimized 100+ collections and databases using **MongoDB**.
- Took the initiative to design and lead the development** of an AI Agent ecosystem for Kazam products and services, equipping them with autonomous tools that empowered users, reduced dependency on the support team, and improved issue resolution efficiency by **40%**.
- Automated **cross-source data workflows** by fetching data from **MongoDB**, **Google Sheets**, and **PostgreSQL** using Python scripts, transforming it in **Power BI**, and scheduling daily refreshes via **On-Premises Data Gateway**, significantly reducing manual effort.
- Introduced and deployed **ML algorithms** to predict **Developed ML models to predict EV charging prices based on time-of-day and weekday usage patterns, enabling time-based pricing strategies that optimized charger utilization and increased revenue.**

Simplify Healthcare

October 2023 – April 2025

Data Engineer

Remote

- Innovated and implemented a scalable **benefits extraction solution** for SBC, BenHi, and EOC files by leveraging **PyMuPDF** for content extraction, automating data annotation in **Label Studio**, **fine-tuning models** with **SimpleTransformers** library, and deploying them via **FastAPI**, achieving response times of **<1 second**.
- Led the benefits extraction project, developing scripts to process large datasets and analyze benefits information. Successfully handled EOC files exceeding 250 pages and extracted **100+** benefit values in just 3 seconds, ensuring high efficiency and accuracy across multiple data sources.
- Executed **end-to-end data analysis** by extracting and transforming datasets from **Snowflake** using **SQL**, and designed **interactive visualizations on the company's web platform**, delivering actionable insights that directly supported decision-making.
- Discovered and deployed an **ML model** that automatically predicted **column names from data values**, improving **data standardization** and reducing manual mapping efforts by **90%**.

PROJECTS

Improved ChatBot | Dr. RML Avadh University [GitHub](#)

- Established a Streamlit-based educational chatbot that integrated conversational memory, enhancing student engagement and reducing query resolution times by 25% through efficient, context-aware responses.
- Integrated **Hugging Face Embeddings** of **sentence-transformer** with **FAISS Vector Database** for fast and accurate document retrieval.
- Leveraged **open-source** LLMs (Mistral/Mixtral) using **Groq API** for query understanding and response generation, ensuring scalability and cost-effectiveness.

Travel Planner Agent | AI-Powered Travel Automation Tool [GitHub](#)

- Integrated **Aviationstack** and **OpenTripMap** APIs in the AI travel planner, automating real-time flight data, hotel availability, and tourist attraction information, managing 5 API calls per generated itinerary.
- Integrated external **APIs (Aviationstack, OpenTripMap)** to fetch real-time flight data, hotels, and tourist attractions based on user input.
- Automated **Google Calendar** event creation with **OAuth2** authentication, scheduling travel details and itineraries directly for users.

TECHNICAL SKILLS

Languages: Python, SQL, MongoDB Query Language (MQL)

Data Engineering Databases: MongoDB, PostgreSQL, MySQL, Snowflake, AWS RDS, Vector Databases

Machine Learning AI: Feature Engineering, Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Embeddings, Fine-Tuning, Retrieval-Augmented Generation (RAG)

Frameworks Tools: FastAPI, PyMuPDF, SimpleTransformers, Label Studio, Ollama, Datamorph, Jupyter

Notebook, Google Colab, Visual Studio, Python IDLE

Data Analytics Visualization: Data Analysis, Microsoft Power BI, MS Excel, Data Visualization, Reporting Automation

Other Tools: MySQL Workbench, DBeaver:

EDUCATION

Bachelor of Technology in Computer Science and Engineering

November 2020 – August 2024

Dr. Rammanohar Lohia Avadh University

CGPA: 8.4
