SUMMARY

AI Developer with strong mathematical foundations, experienced in multilingual LLM apps and RAG pipelines. Skilled in FastAPI, LangChain, Pinecone, PostgreSQL

EDUCATION

M.Tech in Artificial Intelligence (CSE), National Institute of Technology Bhopal (NIT Bhopal) June 2025
CGPA:6.82

B.Tech in Mechanical Engineering, St. Mary's Technical Campus Kolkata June 2022
CGPA: 8.32

SKILLS

Programming Languages

Python, C++

Specializations

Python Development, NLP, Machine Learning, Deep Learning, Generative AI, OCR

RAG & Agentic AI Framework

LangChain, LangGraph, LLM APIs

Databases & Storage

Pinecone (Vector Database), PostgreSQL, AWS S3 Bucket

Tools and Platforms

Git, FastAPI, RESTful APIs, JWT Authentication, Google Auth, AWS SES

Libraries

Scikit-learn, TensorFlow, Huggingface, OpenCV, NLTK, Spacy

EXPERIENCE

AI Engineer — Gravitas AI

1st July 2025 – 4th November 2025

- Developed a multilingual (Hindi + English) document-based RAG chatbot with OCR, web-scraped inputs, inline citations, and Pinecone-based semantic retrieval.
- Implemented local serverless setup with API Gateway, JWT authentication, and AWS SES for secure access.
- Managed document storage on S3 and user data (profiles, chats, messages, plans, subscriptions, usage limits) using PostgreSQL.

SELF PROJECTS

AI Interview Assistant

May 2025 [GitHub](#)

- FastAPI app that analyzes resumes and generates summaries with tailored interview questions using a LangGraph workflow for experience, education, and insights extraction.

Satellite Image Classification

October 2024 [GitHub](#)

- Developed lightweight CNN models with 94% accuracy and 30% fewer parameters, optimized for real-time use on low-resource platforms using channel separation and SE blocks.

RAG Based PDF Query System

March 2024 [GitHub](#)

- Built a Question Answering system using LangChain with project-based PDF text extraction, semantic search via SBERT embeddings and Faiss, and answer generation through the Mistral API. Incorporated efficient text chunking.
- Tools & Technology:** Python, SBERT, Chroma, Mistral API, FastAPI

ACHIEVEMENTS

Qualified GATE with score of 496
