🏆 kaggle

Professional Summary

Data Science and Data Analysis professional with expertise in Machine Learning, Advanced Excel, EDA and cloud. Experienced in Python, ETL, and ML frameworks such as TensorFlow, PyTorch, and OpenCV. Strong understanding of Agile methodologies. Skilled in leading small, cross-functional teams and delivering efficient, data-driven solutions.

Experience

Data Science Intern - Main Flow

Feb 2025 – May 2025

- Developed and deployed real-time ML models for internal analytics.
- Implemented scalable pipelines using Python and AWS, improving automation efficiency by 12%.
- Collaborated with engineering teams to enhance model deployment and monitoring.

Data Analyst Intern - Unified Mentor

Oct 2024 – Nov 2024

- Assisted in predictive modeling projects focused on customer segmentation and retention.
- Performed feature engineering, data cleaning, and model evaluation using Python.
- Created visualization dashboards using Power BI for business performance tracking.

Technical Skills

Core Expertise: Machine Learning, Deep Learning, ETL, Data Analysis, A/B Tests

Languages & Tools: Python, SQL, TensorFlow, PyTorch, OpenCV, Scikit-learn, Pandas, NumPy

Cloud & Platforms: AWS, GCP, Oracle Cloud, Linux

Visualization: Power BI, Tableau, Matplotlib, Seaborn

Professional Skills: Agile Methodologies, SDLC, Team Leadership, Communication

Projects

Customer Churn Prediction using ML Pipelines

Aug 2025 – Sep 2025

- Built an end-to-end churn prediction pipeline using Scikit-learn and XGBoost achieving 92% accuracy.
- Applied feature selection and cross-validation to improve model generalization.
- Created interactive dashboards in Power BI for churn visualization and insights.

Superstore Sales & Profit Prediction using Machine Learning

May 2025 – Jun 2025

- Built a regression model using Scikit-learn to predict profit from sales and discount data.
- Conducted EDA and preprocessing with Pandas, and visualized trends using Matplotlib.
- Tuned Random Forest Regressor for accuracy and automated result export to Excel.

Student Pass & Fail Analysis using Machine Learning

Jan 2025 – Feb 2025

- Developed a Logistic Regression model to classify students into pass/fail categories.
- Performed EDA to identify key academic and behavioral factors influencing performance.
- Improved prediction reliability through hyperparameter tuning and data balancing techniques.

Certifications

- **IBM:** Enterprise Data Science in Practice, Getting Started with Enterprise Data Science
- **AWS:** AWS Academy Cloud Foundations, AWS Academy Cloud Architecting
- **Google:** Introduction to Generative AI
- **Oracle:** Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- **IBM Skills Network:** Data Analysis with Python

Education

B.Tech in Computer Science Engineering

2025

Dr. Babasaheb Ambedkar Technological University, Chhatrapati Sambhaji Nagar, Maharashtra
